

# RESEARCH AND DEVELOPMENT

Our extensive research and development activities help to create innovative solutions in all areas of ventilation technology and air conditioning. In addition to planned development work for the individual product groups, project-related development projects are becoming ever more important.

The main activities of our Research & Development division are as follows:

- Development of new products and technologies
- Optimisation of existing products
- Project-related tests with product development
- Catalogue documentation, lectures and publications
- Customer advice and information

MEASUREMENTS ON SOUND ATTENUATORS  
ACOUSTICS

EXTENSIVE MEASURING EQUIPMENT
