

FAT

The TROX FAT is a solution for controlling pressurised floors. It consists of : a floor diffuser made of plastic, a housing from galvanised sheet steel (insulated), a radial fan, a heater (optional), a controller and the black drip tray.

The controller regulates the fan speed & the heater capacity in response to the thermal demand related to the set point and the room temperature. Minimum and maximum fan speed can be adjusted. The FAT is delivered with a remote control containing set point regulator and sensor.

Leaflet for this product is being revised.
